

BUILDING: A total of 55 building permits were issued in May, as illustrated below. This activity is consistent with May 2019, in which 52 building permits were issued.

STORMWATER: As of May 1, 2020, Staff has been tracking stormwater inquiries through a separate “*Report a Concern*” form dedicated to Stormwater/Drainage problems. This form is available via a link on the main web page. We continue to encourage residents to use this as a primary way of communicating stormwater concerns to the Village. All problems identified in “public right-of-way” receive priority and are referred to CTHD for inspection as deemed appropriate. Drainage problems on private property involve continuing education on the maintenance of swales, ditches and drain tile.

SERVICE DELIVERY: Staff will soon be making modifications to the service delivery of building-related functions. B&F Construction Code Services, Inc. who currently handles the Village’s building inspections, will have a staff member on site at the Village Hall to manage the day-to-day inquiries and approvals required for issuing building permits. The changes will become effective the week of June 22, 2020.
